

“PEPEY COIN” PROJECT PROGRESS REPORT

“The Queen of All Meme Coins”

Date: January 17, 2025

This report outlines the progress and achievements of the PEPEY coin project during the first 10 days since its launch on January 7th, 2025.

“\$PEPEY - Everything is in Trusted Hands.”

Who is Behind the Project \$PEPEY?

The PEPEY Coin project is developed and backed by a leading technology solutions company, with its identity to be revealed in the future. The PEPEY team, as Solana developers, brings the PEPE memecoin revolution to the Solana network.

Vision and Mission

\$PEPEY aims to become a **billion-dollar market cap meme coin** while introducing PEPEY as the wife of PEPE by embracing the terms Queen, King, and Kingdom, (PEPEY Coin is the Queen to the King, PEPE Coin) we present this concept with a touch of creativity and elegance, establishing a unique narrative within the meme coin ecosystem. **There has long been a need for a bold, vibrant, and empowering female icon to represent the meme coin world — and PEPEY fills that role.**

We are proud to position **\$PEPEY** alongside and similar to prominent meme coins like **Pepe, Shiba Inu, Bonk, and Coq Inu**. However, we are **not a Pump.fun-type token**. We want \$PEPEY to create wealth for many people and play a meaningful role in the broader cryptocurrency revolution.

Launch Highlights:

- \$PEPEY made history at launch by executing an unprecedented token burn of 351 trillion tokens, marking the largest burn ever recorded in cryptocurrency history. This revolutionary move permanently reduced the total supply to 69.69 trillion tokens, setting a new standard in the crypto world.
- The burned tokens represent approximately **\$772,200** in market cap value at today's prices.

Market Performance:

- Surpassed a \$200,000 market cap, now trading around \$150,000.
- The \$PEPEY community has organically grown to over 500 holders.
- \$PEPEY is **actively traded across multiple decentralized exchanges (DEXs) and One CEX**, achieving daily all-time highs consistently for the past 10 days.

Platform Listings:

- Application to CoinMarketCap (CMC) has been successfully submitted.
- \$PEPEY is now recognized and listed on CoinPaprika.
- Successfully listed on Azbit, the project's first centralized exchange (CEX).
- **Engaged in discussions with Tier 1 to Tier 3 CEXs for additional listings.**

Community and Development:

- Gaining attention from game developers and story writers.
- We have received invitations from top ten online cryptocurrency sites to feature \$PEPEY's story once the market cap reaches \$10 million or higher.
- We are completing an online text-based interview with Chris Beverly from MemeCoinSeason.io
- A skilled team from BrandPush, known for their expertise in writing business stories, is in good standing with PEPEY and will write and publish our story.
- A strong volunteer base from around the globe supports the project's growth and outreach efforts.

Strategic Moves:

- Secured interest from private and angel investors. We are encouraging them to purchase and **hold \$PEPEY to support the goal of reaching a \$1 billion market cap.**
- Proactively protecting token value by refraining from airdrops or giveaways, minimizing the risk of market dumps.
- Boost \$PEPEY's presence across social media platforms through active engagement and strategic collaborations.

Upcoming Developments, Next CEX Listing

- **MintMe Listing: \$PEPEY will be listed on MintMe within the next 24–48 hours from this publication, reaching a new community.**
- Website and Marketing: **Preparing a press release for hundreds of global news platforms.**
- **Engaging Reddit, Discord advertisers, and crypto YouTube influencers to promote \$PEPEY.**
- Platform Applications: **We will complete applications (Including KYC) for all available cryptocurrency data platforms within the next two weeks.**
- **After surpassing a \$100K market cap, we received several emails regarding potential collaborations with the well-known PEPE Coin community. We are currently verifying their identities and awaiting their formal collaboration proposals.**
-

Financial Transparency & Stability:

- Project funds include 7% of the tokens reserved for Tier 1 and 2 CEX listings and liquidity provisioning.
- A robust marketing budget is in place to drive growth through press releases, videos, and advertising campaigns.

We are here to become a 1B market-cap meme coin. PEPEY represents technology, honesty, and humanity, and we are committed to taking this project beyond expectations.
